

# REMAP-CAP

Randomized, Embedded,  
Multifactorial Adaptive Platform  
trial for Community-Acquired  
Pneumonia

April 2018

## NEWSLETTER

*REMAP-CAP: randomization of standard of care treatments to patients with severe CAP admitted to the Intensive Care Unit.*

### Meet our local CROs

Two clinical research organizations (CROs) are taking care of conducting REMAP-CAP. Their tasks consist of e.g. ethical application, national study management and monitoring. HungaroTrial is responsible for the implementation in Romania and Hungary, where Synovia is responsible for conducting REMAP-CAP in Croatia. Some of our local CRO members are presented on the left.

### New CRF on-air

We can proudly announce you, that since March 9 2018, the new REMAP-CAP eCRF is on-air! This means that activated sites can now actively include new patients into the eCRF. The eCRF was created by UMC Utrecht using the data management system 'Research Online'. Patients will be automatically randomized into one of the options that a site has chosen for.

### Status approval (Ethical committee and Competent Authority)

- Netherlands: approved
- Ireland: submitted
- Portugal: submitted
- Romania: submitted
- Croatia: submitted
- United Kingdom: submitted
- Germany: in preparation
- Belgium: in preparation
- Spain: in preparation
- Czech Republic: in preparation

### Upcoming events

Below you will find an overview of the upcoming events where some of our management members will be present: the perfect opportunity to meet and extend your network!

Event	Date	Location
ECCMID 2018 (booth # 37)	21-24 April	Madrid
PREPARE General Assembly	14-15 May	Berlin

### Are you interested to join?

If you would like to join the REMAP-CAP Study, please send an email to the general REMAP-CAP email address (below). The members of the Regional Coordinating Committee will provide you with essential information and guide you through the process of becoming a member of the REMAP-CAP family.
