cap@icnarc.org**

UPDATES & REMINDERS

JAMA publication

- ❄️ The REMAP-CAP long term outcomes paper has been published in JAMA. Follow the [link](#) to read.
- ❄️ We are pleased REMAP-CAP have led the way in analysing the long-term outcomes for COVID-19 and collecting these important findings!

Cysteamine domain

- ❄️ The cysteamine domain is open in both the pandemic and non-pandemic strata.
- ❄️ In order to open this domain at your site we require a signed domain choice page, approval for AM028, 29, 35 & 36 and training logs which can be found [here](#). Once these are in place please send your shipping request form to ukremap-cap@icnarc.org.

MHRA Audit

- ❄️ In the New year the REMAP-CAP trial will be inspected by the MHRA the week commencing the **16th January 2023**.
- ❄️ They will also be visiting two hospitals, which they will choose at a later date.
- ❄️ We understand this has come at a difficult time for everyone with winter pressures and REMAP-CAP expanding, but it is important we show the MHRA the quality of our work.
- ❄️ Please bear with us with responding to your emails at this busy time.

INFLUENZA STRATUM

DOMAINS

Antiviral Domain

- ❄️ Oseltamivir
- ❄️ Baloxavir

Immune Modulation Domain

(To be opened in the new year)

- ❄️ Tocilizumab
- ❄️ Baricitinib

Corticosteroid Domain

- ❄️ Dexamethasone

AMENDMENT 37

❄️ We now have full REC / MHRA / HRA approval for substantial amendment 37. This includes recruitment on the wards, as well as ICU, and also the inclusion of children.

❄️ It also adds baloxavir (as well as the combination of oseltamivir & baloxavir) to anti-viral domain and dexamethasone to the corticosteroid domain.

❄️ We & the NIHR CRN are requesting for R&D's to expedite review of this amendment.

❄️ The approved documents included in the submission are available for download from the [ICNARC website](#).

All influenza documentation including training, PIS/ICF and protocols can be found on the [influenza trial page](#) of our website.

WEEKLY Q&A

SESSIONS:

Follow the zoom [link](#) to join.

2022 MILESTONES

JANUARY 11 2022

Updated Immunoglobulin domain opens

MARCH 22 2022

[Antiplatelet paper](#) published

JUNE 16 2022

ACE2RAS domain closed for moderate state patients

JULY 06 2022

'Continuation of the therapeutic dose anticoagulation' intervention of the Anticoagulation domain was closed.

JULY 18 2022

Vitamin C domain paused due to results from the LOVIT trial.

OCTOBER 21 2022

REMAP-CAP were selected by the NIHR as the platform trial to evaluate therapeutic interventions for influenza.

DECEMBER 16 2022

[Long-term outcomes paper](#) published in JAMA.

FEBRUARY 24 2022

ACE2 RAS domain closed for critically ill (i.e., severe state) patients

APRIL 22 2022

1st patient randomized to updated Immunoglobulin domain

JUNE 17 2022

Vitamin C domain paused for non-pandemic patients due to results from the LOVIT trial

JULY 16 2022

Vitamin C domain paused for pandemic patients due to hitting a statistical trigger.

AUGUST 28 2022

10,000th patient randomised to the study worldwide.

NOVEMBER 02 2022

First influenza patient recruited.

Happy Holidays!

Dear research teams,

We want to again say a massive thank you for all your fantastic work and support of REMAP-CAP.

We wish you all a very happy holiday filled with celebration and relaxation and look forward to continuing working with you all in 2023!

All the best,

UK REMAP-CAP Trial Management Team
