

REMAP-CAP Influenza Antiviral Domain Version 2.2 dated 16 October 2023

## Summary

In this domain of the REMAP-CAP trial, participants with community-acquired pneumonia admitted to participating sites with microbiological testing-confirmed influenza infection will be randomized to receive one of up to 6 interventions depending on availability and acceptability:

- No antiviral agents (no placebo)
- 5 days of oseltamivir
- 10 days of oseltamivir
- Baloxavir marboxil (“baloxavir” from henceforth) on days 1 and 4
- 5 days of oseltamivir + baloxavir on days 1 and 4
- 10 days of oseltamivir + baloxavir on days 1 and 4

At this participating site the following interventions have been selected within this domain:

- No antiviral agents (no placebo)
- 5 days of oseltamivir
- 10 days of oseltamivir
- Baloxavir on days 1 and 4
- 5 days of oseltamivir + baloxavir on days 1 and 4
- 10 days of oseltamivir + baloxavir on days 1 and 4

This domain includes patients aged  $\geq 28$  days old. In this region, this domain will be offered to eligible participants aged:

- $\geq 28$  days and  $< 12$  years old
- $\geq 12$  years and  $< 18$  years old
- $\geq 18$  years old

Is the site participating in the Influenza antiviral Domain?  YES /  NO

(If yes, please also indicate participation in the different states in the table below)
