AM15	REC HRA MHRA	06.05.20	12.05.20		<p>Doses of Anakinra approved as per AM011, but not updated on the CTA.</p> <p><b>New dosing from Immune modulation domain v2:</b>  Anakinra will be administered as an intravenous bolus injection via a central or peripheral line. A loading dose of 300 mg will be administered, followed by maintenance doses of 100 mg of anakinra administered every 6 hours. In patients with creatinine clearance of less than 30 ml/min or receiving renal replacement therapy, anakinra will be dosed every 12 hours.  Duration of therapy  Anakinra will be administered four times daily until the patient has been breathing without receiving invasive mechanical ventilation for more than 24 hours or for 14 days in patients who continue to receive invasive mechanical ventilation. For patients not receiving invasive mechanical ventilation, the drug will stop on ICU discharge or after 14 days, whichever occurs first.</p> <p>Correction to an error in our original MHRA CTA application regarding specific populations of patient included in this study. We had ticked excluding women of child bearing age (using and not using contraception) , but as discussed with the MHRA at that time, these patients would be included for some IMPs but not others. In light of the pandemic we feel this population of patients as well as pregnant women and breastfeeding</p>
------	--------------------	----------	----------	--	--

					women, would benefit from this study and would like to ensure they are able to be included. Pregnant and breastfeeding women are excluded from certain domains and if treating clinicians feel it would not be in their best interest to enter the study, they can be excluded on an individual basis
AM016	MHRA	20.05.20	22.05.20		<p>Addition of 2 IMP products to the CTA</p> <p>1. The addition of unlicensed Sarilumab. The manufacturer (Sanofi Montpellier) will be providing the study with both licenced and unlicensed product for use in REMAP-CAP. The unlicensed product will be provided with clinical trial labels (submitted to MHRA), GMP certification and QP declaration. Sarilumab will be supplied to trial sites through PHE authorised distribution sites</p> <p>2. The addition of Kaletra 80mg/20mg Oral Solution.</p>
AM017	REC HRA	23.05.20	26.05.20		<p>MHRA requested a pause to hydroxychloroquine allocation within the REMAP-CAP study.</p> <p>The pause to this intervention was part of an urgent safety measure.</p> <p>For patients who are currently being treated with hydroxychloroquine, an</p>

					individual risk assessment by the treating clinician should be made as to whether to continue or stop the treatment as per protocol.
AM018	MHRA	01.06.20	03.06.20	MHRA CTA	Addition of releasing site information to section D9 of the MHRA CTA for unlicensed Sarilumab and the Kaletra oral solution
AM019	REC HRA MHRA	05.06.20	11.06.20	REMAP-CAP COVID-19 Immunoglobulin Therapy Domain-Specific Appendix V1.1- 01 June 2020 Summary of changes to Pandemic Appendix to Core Protocol V1.0 - 24 May 2020 REMAP-CAP - PATC - V2.0 - 18 May 2020_CLEAN	Changes to Pandemic Appendix to Core – Alignment of REMAP-CAP and REMAP-COVID in readiness for pre-ICU randomisation for certain domains, and the introduction of moderate and severe patients.  Changes to Immunoglobulin domain.
AM020	Rec HRA MHRA	<b>10.07.20</b>	<b>15.07.20</b>	<b>Updates to the Therapeutic Anticoagulation Domain Specific Appendix:</b> REMAP-CAP - Therapeutic Anticoagulation - V2 - 24 June 2020_TC REMAP-CAP - Therapeutic Anticoagulation - V2 - 24 June 2020_CLEAN Summary of changes to Therapeutic Anticoagulation Domain-Specific Appendix V1.0 - 24 June 2020_FINAL The main change to this domain is to include patients with COVID-19 before they are admitted to ICU. We have therefore made changes to the participant information sheets to include these patients. We have reformatted the documentation to be more modular (for use in the general hospital ward and in the intensive care) and simplified and clarified the wording in various places. This reformatting has also been completed for the non-pandemic IS_CF documentation.  <b>The addition of 2 new Domain specific Appendices:</b> REMAP-CAP Vitamin C Domain Specific Appendix V2 - 08 June 2020 for patients with COVID-19 and community acquired pneumonia ( <b>not yet active</b> ) REMAP-CAP Simvastatin Domain-Specific Appendix - V1.0 - 07 July 2020 for patients with COVID-19 ( <b>not yet active</b> )

NS01	REC HRA			<p>Updated document: UK REMAPCAP PerLR ICF v2.3 2019.06.20</p> <p>Superseded document: UK REMAPCAP PerLR ICF v2.2 2019.06.20</p>	<p>Notification of a typographical error in the REMAP-CAP information sheet / consent form for Personal Legal representative. On page 8, it was incorrectly titled ' consent form for patients able to give consent'. I have amended it to ' consent form for patients <b>unable</b> to give consent</p>
NS02	REC HRA				<p>Addition of 12 new recruiting sites (HRA and REC had confirmed that new sites should be added as part of non substantial amendment to fast track approvals during the pandemic)</p>
NS03	REC			Old document	Typographical error on ProLR V1.1

	HRA MHRA			UK REMAP-CAP ProLR ICF V1.1 2018.11.30 Updated document UK REMAP-CAP ProLR ICF V1.2 2020.04.20	Header indicated Protocol version 2 rather than version 3
NS04	REC HRA	20.09.21	20.09.21	NIHR funding extension agreement	This involves clarification that the current funding allows for continued REMAP-CAP recruitment till the 30 <sup>th</sup> June 2022. Updated end date for patient recruitment. REMAP-CAP is designed as a perpetual study but additional funding extensions (provided by the RECOVER agreement and the NIHR) are now in place to continue recruitment of REMAP-CAP patients till 30.06.22
NS05	REC HRA	13.10.21	N/A	UK REMAP CAP Retro PIS ICF V2.6 2021.08.16 CLEAN	As part of AM028 all pandemic and non-pandemic participant information sheets and consent forms were updated, reviewed and approved, as well as the summary information sheets. Unfortunately due to the volume of participant information sheets submitted during the upload process the UK REMAP-CAP Retrospective Information for participants and Consent Form, V2.6 (track changed and clean version) dated 16th August 2021 was missed. The changes were exactly the same as those submitted, reviewed and approved for the other documentation submitted for English Sites, Northern Irish sites and Scottish sites. For this reason this missed document is being submitted as part of a non substantial amendment

NSA10	HRA	31.10.2024	31.10.2024	237150_NSA10_locked_PDF Grant agreement letter until Nov24	Correction of study end date to 30 <sup>th</sup> Nov 2024
NSA11	HRA	27.11.2024	27.11.2024	237150_NSA11_locked Grant agreement letter until Nov25	Study end date extended until 30 <sup>th</sup> Nov 2025

**FYI, during the approval process for the 1<sup>st</sup> three substantial amendments, the HRA's incorrectly labelled every amendment as Amendment 01 on the approval letter. They were made aware of this, but as all the other pertinent information on the document was correct, they did not feel the need to re-issue the letter.**
